GENERAL OUTREACH

Welcome tours and orientation sessions

Collaborations with research program staff, faculty, and student government to provide professional development workshops and other opportunities to students

Mass emails (CRM) & Bulletin

Fairs allow students to meet research program administrators directly

FINDING & APPLYING TO RESEARCH PROGRAMS

The Matching Quiz makes the process of determining eligibility for programs easy for students

Students are directed to an online "General Application" to apply to multiple programs simultaneously

PROGRAM FLYERS & WEB ADVERTISEMENTS

MORE ONLINE RESOURCES & SOCIAL MEDIA

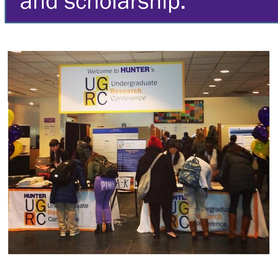
Students can "Ask SciMON" to find out about research and get answers from staff, browse our growing Research Opportunities Database, or connect via social media

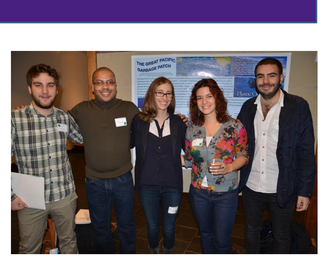
@HunterSciMON

Creating a culture of research through institutionalization and administrative policy-making

UGRC Undergraduate Research Conference

Hunter's annual Undergraduate Research Conference provides a forum for Hunter undergraduates from all disciplines and departments to present their research or scholarship via poster sessions and oral presentations. The conference also includes sessions about pursuing research opportunities at Hunter and beyond and an awards ceremony that honors the best student posters and presentations as well as faculty excellence in mentoring undergraduates in research and scholarship.





AWARDS FOR FACULTY & STUDENTS

UNDERGRADUATE RESEARCH • INITIATIVE

The mission of the Undergraduate Research Initiative is to provide Hunter students across the disciplines with the opportunity to conduct research alongside Hunter's outstanding faculty and to encourage and support those faculty who provide Hunter's undergraduates with research experiences outside the classroom.

HIRING HUNTER'S FIRST DIRECTOR OF UNDERGRADUATE RESEARCH

The position of Director of Undergraduate Research was created as part of Hunter's strategic plan to increase student success and engagement by expanding research opportunities for undergraduates.

Measuring impact through evaluation

ASSESSMENT STRATEGIES

A variety of evaluation tools and resources are used to assess the impact, and guide the future, of undergraduate research initiatives at Hunter throughout the year.

- ❑ Student Awareness Survey
- ❑ Post-Workshop Evaluations
- ❑ SciMON External Evaluator
- ❑ SciMON Program Administrator Meetings & Correspondence
- ❑ UGRC Evaluations
- ❑ Graduate Audit Survey
